No Smoking Sign (Trash-mounted)

Santa Clara County Ordinance NS-625.5 stipulates, “Smoking is prohibited in all enclosed buildings and facilities, within 30 feet of all buildings, in covered walkways, during indoor or outdoor athletic events, during other University sponsored or designated indoor or outdoor events, at or within 30 feet of bus stops and other services lines, and in outdoor areas designated by signage as ‘smoking prohibited’ areas.” No sign should be posted in an area (beyond 30 feet) where smoking is technically permissible. When a trash receptacle is near desired sign location, the sign should be mounted on the receptacle instead of its own pole.

Specifications:
- Round sign to be 1/8” aluminum plate (9” diameter).
- Maximum of 2 plates per receptacle. If 2, plates should be 180 degrees apart in plan view.
- Connection bolts/threaded rods should NOT be visible from the face of the sign.
- Connection should NOT permanently damage trash receptacle (i.e. holes should not be drilled through receptacle).
- Connection should be centered and wrapped around the receptacles band (as shown).
- Connection should not disturb the process of emptying the trash.
- Small bottom text must read:

  SMOKING MUST BE AT LEAST 30 FEET FROM
  BUILDING OPENINGS, VENTS, AND COVERED WALKWAYS.
